December 13, 2023

Dear Admission Committee,

I am writing this letter to wholeheartedly recommend Biniyam Dereje, an exceptional student who has consistently shown remarkable dedication and skill in the field of Software Engineering throughout his BSc study at our Center of Information Technology and Scientific Computing (ITSC) at the Addis Ababa Institute of Technology. He enrolled in my course Fundamentals of Web Design and Development in Spring 2018. I was also his advisor for his capstone project in 2022. Throughout his study, Biniyam showed a remarkable academic performance accompanied by a great set of soft skills.

In the Fundamental of Web Design course, Biniyam consistently had a profound understanding of complex concepts and a remarkable ability to apply theoretical knowledge to practical scenarios which was demonstrated during his project. He always went beyond the class expectations and included more advanced topics for his assignment deliverables. For his semester project, he implemented a full-fledged hotel management system, where people can order food, book hotel rooms, and track their food delivery live. The system was built with a NodeJS API server and frontend ReactJS-based UI framework. Apart from a well-architected backend system, he built a beautiful and fully functional user interface. He also implemented a path planning algorithm for the delivery functionality that minimizes the cost of delivery. The simplicity of the end product was impressive. Overall, his assignments and projects consistently reflected a high level of proficiency and creativity.

Furthermore, I had the privilege of observing Biniyam's dedication, creativity, and problem-solving skills in his senior-year capstone project that focused on developing a financial expenditure tracking system. This initiative exemplified his commitment to incorporating cutting-edge technologies for practical problem-solving. The project utilized blockchain technology to enhance security measures, thereby bolstering transparency and accountability in the management of project finances. This project showcased Biniyam's ability to apply complex concepts to real-world scenarios effectively. Beyond his academic achievements, Biniyam exhibited excellent teamwork and communication skills, fostering a collaborative learning environment that enhanced the classroom experience. His questions and insightful contributions enriched our discussions and encouraged his peers to think critically about the subject matter.

Considering Biniyam's academic skills, work ethic, and remarkable character, I am confident that he possesses the qualities essential for success in his further studies and endeavors. His passion for software engineering, coupled with his demonstrated aptitude, undoubtedly makes him a strong candidate. Thus, I wholeheartedly recommend Biniyam Biniyam for admission to the MS Computer Science program at University. Please feel free to contact me at amanuel.negash@aau.edu.et if you require any further information.

Sincerely,

Amanuel Negash
